

# FILLINGS & TOPPINGS FOR BAKED GOODS

RAPS Product solutions for appealing and tasty bakery applications

# FILLINGS & TOPPINGS FOR BAKED GOODS

Consumers today expect baked goods to deliver an authentic, artisanal experience – with both exceptional taste and a wide variety of options. At the same time, manufacturers require reliable, efficient solutions that meet the highest standards of quality and performance. This is where our capabilities come into play. We combine deep expertise in taste and functional solutions to create innovative, tailor-made bakery applications.

Our portfolio covers a broad spectrum of product solutions for different applications, including savoury fillings, toppings

and sauces, as well as dry seasonings, spices & herbs or décor seasonings and functional, encapsulated solutions. Next to binding systems we provide individual taste solutions and specially developed bakery marinades that enhance your product from the inside as well as from the outside.

In short, we partner with you to turn bakery concepts into high-performing, market-ready products that meet evolving consumer expectations.

Learn more about our various fillings and toppings for your next product innovation:

## DRY AND LIQUID SOLUTIONS FOR FILLINGS AND TOPPINGS

### Base options:

vegetables, herbs, meat, fish, dairy, meat & fish alternatives and vegan options possible

### Your advantages at a glance:

- ⊕ Broad variety of solutions for taste improvement & visual/colourful appeal
- ⊕ Freeze-, thaw and baking-stable
- ⊕ Ready to use, easy and safe handling
- ⊕ Highly versatile
- ⊕ Various packaging options from bags and sachets to buckets and canisters
- ⊕ Enabling authentic as well as innovative taste concepts
- ⊕ RAPS FRESH technology (liquid and viscous solutions based on chilled and frozen raw materials)

## DIFFERENT PRODUCT SOLUTIONS FOR DIFFERENT APPLICATION NEEDS

### Décor Seasonings - Dry

Our decorative seasonings for bakery applications are designed to deliver both visual appeal and consistent performance.

### Binding Systems - Dry

Cold binding system that can be added to a base of curd/cream cheese and egg yolk together with seasoning blends to create individual and tasty bakery fillings.

### Bakery Marinades - Liquid

Our palm-free, oil-based bakery marinades have been specially developed for baked goods. They are primarily intended for in-dough applications but are also highly valued as toppings.

### Fillings, Preparations, Pastes & Chutneys - Liquid

We offer a variety of different on-trend fillings, preparations, pastes and chutneys with different textures and taste profiles. They bring great visual appeal and deliver an authentic taste, thanks to our RAPS FRESH technology. Ambient pastes based on spices and herbs also available.

# SPICE EXPERTISE AND INGREDIENT EXCELLENCE

## Combining Taste & Functionality

At RAPS, everything revolves around taste and functionality. With 100+ years of experience, we've grown from a spice trader to a global solutions provider, supplying seasoning blends and spice mixes, functional ingredients and more to food manufacturers, foodservice, retail and butchery.

Our raw material and ingredient expertise, technological strength, and innovative mindset enable tailored solutions across a wide range of applications – from meat, fish, and plant-based foods to sauces, delicacies & ready meals, baked goods, dairy, confectionery and snacks. With a strong focus on quality, functional performance, and the highest standards of food safety, we help our customers meet evolving market demands.

## Product Solutions & Technologies

RAPS develops high-quality, tailor-made solutions for a wide range of applications. Our portfolio includes dry products such as spice blends, individual herbs and spices, functional ingredients, and compounds, as well as liquid and viscous solutions like sauces, marinades, and savoury pastes and preparations.

Leveraging innovative technologies such as CO<sub>2</sub> extraction and microencapsulation, we enable forward-looking product developments with enhanced functionality, stability, and taste.
